INDEX

ABSORPTION, digestive, pancreatic secretion and, 210.

Acetone in expired air, 5.

Acetylcholine, action of, in arrest of experimentally induced convulsions in cat, 29.

——, electrocardiograms of effects of, after division of vagi, 30.

——, reaction of dog's stomach to, 112.

——, vasomotor effect of, on stomach, 330.

Acid secretion of stomach, influence of pylorus on, 685.

Acoustic value of components of the auditory system, 252.

Action potentials in cerebral cortex, anesthetics and, 577.

—— —— of cerebral cortex and spinal cord before and after cortical stimulation, 99.

ADOLPH, E. F. How pituitrin inhibits urine formation, 1.

Adrenal cortex and distribution of body water, 438.

—— cortical extracts, 42.

—— —— hormone, vitamin C and, 187.

—— glands, relation of, to experimental pancreatic diabetes, 131.

—— hypertrophy, compensatory, in rat, 164.

—— insufficiency, experimental, cation permeability of erythrocytes in, and in normal animals after plasma sodium depletion, 73.

—— ——, glucose distribution between blood plasma and cells in, 15.

—— ——, serum sodium and chloride levels in, 15.

Adrenalectomy, cortin and work capacity after, 622.

Adrenalectomized animals, carbohydrate metabolism in, 274.

—— -depancreatized cats, 97.

—— opossum, saline and glucose effects on survival of, 144.

Adrenalectomy, effect of, on response of rat to ketogenic principle of anterior pituitary, 55.

——, sodium and chloride depletion after, 430.

——, total, effect of, on experimental pancreatic diabetes, 98.

Adrenalin, effect of, on plasma volume of normal and sympathectomized dogs, 66.

Adrenals and gonads of rats, after thyroidectomy, in relation to pituitary histology, 166.

Adrenergic vasodilators in the rat, 165, 182.

Adreno-pituitary interrelationships and renal secretion in opossum, 143.

Age, influence of, on insufficient intake of inorganic salt mixture, 55.

Alkali content, chloride and, of duodenal secretions and gastric acidity and emptying time, 337.

ALLEN, W. M. See HECKEL and ALLEN, 73.

Altitude, high, lactic acid in rest and work at, 367.

Altitudes, high, blood sugar and glucose tolerance at, 309.

AMBERSON, W. R., J. STANBURY and E. WARWEG. Total plasmapheresis, 1.

American Physiological Society, Proceedings, 1.

Analgesics, comparison of cobra venom and morphine as, 101.

ANDERSON, I. A. See BUELL, ANDERSON and STRAUSS, 274.

Anesthetics, effect of, on action potentials in cerebral cortex, 577.

Anoxemia, effect of, on gastric emptying time, 156.

——, —— ——, on impermeability of stomach to water, 144.

——, prolonged, effect of, on heart and spleen, 290.

Antiketogenic action of insulin, 322.

Antithrombin in peptone shock, 535.
Apperly, F. L. and M. K. Cary. The chloride and alkali content of the duodenal secretions and their relation to gastric acidity and emptying time, 337.
Auditory system, acoustic value of components of, 33, 252.
Arterial contractions, blood pressure waves and, 295.
Atrial stimuli, heart rhythm following pacemaker and, 358.
Ayres, G. B. and M. Lee. Nitrogen partition of tissues after hypophysectomy and composition of weight loss, 2.

Bachrach, W. H., W. B. Bradley and A. C. Ivy. Effect of epinephrine administration on glucose excretion in depancreatized dogs, 2.
Baetjer, A. M. The effect of diets high and low in calcium and phosphorus on the heart rhythm of young rats, 3.
Baldes, E. J. and K. K. Nygaard. Studies on the coagulability of blood and blood plasma using a photoelectric cell, 3.
——. See Essex, Herrick, Baldes and Mann, 43.
——. See Herrick, Essex, Baldes and Mann, 74.
Banting, F. G. See Ettinger, Hall and Banting, 44.
Banus, M. G., A. Zetlin and D. H. Gersh. The relation of total tension in isometric muscular contraction to initial tension and length of the muscle, 4.
Barbiturate structure, delayed death in relation to, 78.
Bard, P. Oestrual behavior in surviving decorticate cats, 4.
——. See Woolsey and Bard, 165.
Barker, S. B. Determination of acetone in the expired air, 5.
——. See Chambers, Chandler and Barker, 26.
Barnes, B. O. and A. S. Dix. On the mechanism of the susceptibility to insulin in hypophysectomized dogs, 6.
Barron, L. E., G. M. Curtis and W. T. Haverfield. The effect of vagotomy on gastric motility in man, 6.
Bartley, S. H. Temporal and spatial summation of peripheral impulses with activity of the brain, 8.
Bates, R. W., O. Riddle and E. L. Lahr. Racial variation in the crop-gland response of doves and pigeons to prolactin, 7.
——. See Lahr, Riddle and Bates, 94.
——. See Riddle, Bates, Lahr and Moran, 128.
Baumberger, P. and R. K. Skow. Further studies of the relation of the degree of reduction of intracellular cytochrome to the oxidation-reduction potential of cell suspensions, 8.
Bayne, T. L. See Liddell, Sutherland, Parmenter and Bayne, 95.
Bazett, H. C., J. C. Scott, M. E. Maxfield and M. D. Blithe. Calculation of cardiac output from blood pressure measurements before and after meals, 551.
——, ——, ——, ——. Observations on the effects of meals on cardiac output estimated by blood pressure changes and by acetylene, 9.
——. See Burton and Bazett, 21.
Bear, R. S. See Schmitt and Bear, 139.
Beazell, J. M. and C. R. Schmidt. The effect of orally administered malt amylase on the digestion of starch, 10.
Behrmann, V. G. See Brassfield and Behrmann, 14.
Benaglia, A. E. See Bodo and Benaglia, 12.
"Berger rhythm" in normal man and in general paretics, 77.
Berkson, J. and W. M. Boothby. Studies of the energy of metabolism of normal individuals. A comparison of the estimation of basal metabolism from (1) a linear formula and (2) "surface area," 485.
—— —— ——. The variability of the energy of metabolism in normal persons, 10.
——. See Boothby, Berkson and Dunn, 468.

Bernthal, T. G. Changes in heart rate accompanying exposure of the carotid gland region to lowered blood oxygen tensions, 10.
Berrill, N. J. See Tait and Berrill, 153.
Bile, influence of, on sterol in feces, 317.
—— salts from blood, rate of removal of, as affected by thyroxine, 138.
—— ——, influence of liver in formation and destruction of, 214.
——, saponifiable and non-saponifiable matter in, 87.
——, —— —— —— —— ——, as affected by diet, 87.
Bing, F. R. See Quigley, Einsel, Bing and Hanzal, 124.
Bischoff, F. Some physical and physiologic properties of the system insulin-tannic acid, 239.
Bishop, G. H. See O'Leary and Bishop, 115.
Black, L. J. See Covell and Black, 524.
Blair, H. A. Latent addition in muscle and nerve, 11.
Blithe, M. D. See Bazett, Scott, Maxfield and Blithe, 9, 551.
Blocksom, B. H., Jr. See Huggins, Noonan and Blocksom, 83.
Blood and saliva, pulmonary ventilation and pH of, 174.
—— acetone, source of, and site of antiketogenic action of insulin, 110.
—— calcium and protein changes in rest and sleep, 531.
—— capillaries, permeability of walls of, 597.
—— circulation time in dogs as measured by ionization methods, 142.
——, coagulability of and of blood plasma, 3.
—— coagulation, cephalin and corneal extracts in, 48.
—— flow, coronary, 43.
—— ——, peripheral, in surgical shock, 52.
—— ——, renal, hypertension and, 616.
—— ——, systolic and diastolic, in right coronary artery, 67.
—— of dystrophic rabbits, biochemical studies on, 149.
Blood of pigeons during emotional excitement, changes in specific gravity of, 114.
—— plasma, turtle, colloid osmotic pressure, nitrogen content and refractive index of, 24.
—— serum protein of fishes, 155.
—— pressure, influence of skeletal muscle tension and relaxation on, 86.
—— —— tracings of small animals, 164.
—— —— waves and arterial contractions, 295.
—— production, effect of brewer's yeast on, 626.
—— protein and calcium changes in sleep and rest without sleep, 30.
—— —— regeneration, influence of diet on, 109.
——, rabbit, clotting time of, after intravenous administration of ricin, 136.
——, shifting of, in experimental animals, effects of various stimuli on, 60.
—— studies in acute experimental hyperparathyroidism, 25.
—— sugar and glucose tolerance at high altitudes, 309.
—— ——, effect of sympathin on, 12.
—— —— in dogs, influence of sympathetic nerves on effect of pituitary extracts on, 74.
—— —— level, absinthe and, 81.
—— —— —— after physostigmine and atropine, 81.
—— velocity and arterial pulse, 36.
Blum, H. F. and R. J. West. Physiological studies of a condition of abnormal photosensitivity in man, 12.
Bodo, R. C. and A. E. Benaglia. The effect of sympathin on blood sugar, 12.
Bohning, A. See Katz, Jochim and Bohning, 88.
Boldyreff, W. N., N. O. Byland and W. F. Martin. A permanent closeable pancreatic fistula,—a description of the operation and some new experimental data, 13.

Bollens, W. F. See Templeton, Bollens, Lawson, Lutz, Borkon and Galapeaux, 153.

Bollman, J. L. and F. C. Mann. The influence of the liver in the formation and destruction of bile salts, 214.

Bone calcification, effect of gastrectomy in young dogs on, 22.

—— regeneration, influence of thyroid feeding and thyro-parathyroidectomy on, 84.

Boothby, W. M., J. Berkson and H. L. Dunn. Studies of the energy of metabolism of normal individuals: a standard for basal metabolism with a nomogram for clinical application, 468.

——. See Berkson and Boothby, 10, 485.

Borkon, E. L. See Galapeaux, Borkon and Templeton, 55.

——. See Templeton, Bollens, Lawson, Lutz, Borkon and Galapeaux, 153.

Bott, P. A. See Richards, Westfall and Bott, 128.

THE AMERICAN JOURNAL OF PHYSIOLOGY

VOLUME 116

BALTIMORE, MD.
1936

CONTENTS

No. 1. June, 1936

Proceedings of the American Physiological Society, Washington, D. C., 1936 1

The Post-Exercise Suppression of Kidney Function in Man. *Frances A. Hellebrandt, C. Etta Walters and Mary Louise Miller* 168

Comparison of Changes in the pH of Arterial Blood and Saliva During Variations of Pulmonary Ventilation. *Charles R. Brassfield* 174

The Distribution of Adrenergic Vasodilators in the Rat. *Leland C. Wyman and Caroline tum Suden* 182

Vitamin C and the Adrenal Cortical Hormone. *Joseph L. Svirbely and Edward C. Kendall* 187

Lesions in the Pancreas and in the Anterior Hypophysis with Fatal Acidosis Following Prolonged Intravenous Administration of Glucose (in Dogs). *Henry R. Jacobs and Arthur R. Colwell* 194

The Experimental Induction of Oestrus (Sexual Receptivity) in the Normal and Ovariectomized Guinea Pig. *Edward W. Dempsey, Roy Hertz and William C. Young* 201

Is a Portion of the Pancreatic Secretory Response to a Meal Due to the Absorption of Digested Food Products? *John Gray, M. S. Kim and A. C. Ivy* 210

The Influence of the Liver in the Formation and Destruction of Bile Salts. *Jesse L. Bollman and Frank C. Mann* 214

Regeneration of Taste Buds after Suture of the Lingual and Hypoglossal Nerves. *J. M. D. Olmsted and R. R. Pinger* 225

Fusillade Patterns of Inspiratory and Expiratory Muscles and their Effects on the Respiratory Act. *Robert Gesell* 228

Some Physical and Physiologic Properties of the System Insulin-Tannic Acid. *Fritz Bischoff* 239

No. 2. July, 1936

Adaptation to Transposition of Eye Muscles. *J. M. D. Olmsted, M. Margutti and K. Yanagisawa* 245

Acoustic Value of the Several Components of the Auditory System in Cats. *W. J. Brogden, Edward Girden, Fred A. Mettler and Elmer Culler* 252

Influence of the Plane of Nutrition on the Manner of Heat Disposal by Cattle. *M. Kriss* 262

On Carbohydrate Metabolism in Adrenalectomized Animals. *Mary V. Buell, Ian A. Anderson and Margaret B. Strauss* 274

The Electric Phenomena of the Crayfish Claw During Repetitive Stimulation. *H. G. du Buy and G. Coppée* 282

Effect of Prolonged Anoxemia on the Heart and Spleen in the Mammal. *E. J. Van Liere* 290

The Relation between Rhythmic Variations in Blood Pressure and Rhythmic Contractions of the Artery of the Ear of Rabbits and Dogs. *Helene C. Wilson* 295

Alterations in the Electrical Field Produced by Changes in the Contacts of the Heart with the Body. *L. N. Katz, I. Gutman and F. H. Ocko* 302

Blood Sugar and Glucose Tolerance at High Altitudes. *W. H. Forbes* 309
The Influence of Bile on the Excretion of Sterol in the Feces. *A. Shapiro and H. Koster* 317
The Site and Mechanism of the Antiketogenic Action of Insulin. *I. Arthur Mirsky* 322
The Influence of Partial Pressure of O_2 on Body Temperature. *E. Gellhorn and A. Janus* 327
The Vasomotor Effect of Acetylcholine on the Stomach of the Dog. *H. Necheles, P. Levitsky, R. Kohn, M. Maskin and R. Frank* 330
The Chloride and Alkali Content of the Duodenal Secretions and Their Relation to Gastric Acidity and Emptying Time. *Frank L. Apperly and M. K. Cary* .. 337
The Effect of Good Electrical Conductors Introduced Near the Heart on the Electrocardiogram. *L. N. Katz, E. Sigman, I. Gutman and F. H. Ocko* 343
The Urea Clearance of Rats. *Lee E. Farr and Joseph E. Smadel* 349
The Effects Upon the Heart Rhythm of Premature Stimuli Applied to the Pacemaker and to the Atrium. *A. S. Gilson, Jr.* 358
Lactic Acid in Rest and Work at High Altitude. *H. T. Edwards* 367
The Innocuousness of Histamine to the Dog. *Henry R. Jacobs and Elwood W. Mason* 376
Reflex Respiratory Effects from Intermittent Stimulation of the Vagus and Superior Laryngeal Nerves. *Charles J. Hillenbrand and T. E. Boyd* 380
The Physiological Significance of the Electric Responses of Smooth Muscle. *A. Rosenblueth, H. Davis and B. Rempel* 387
The Sensitization of a Sympathetic Ganglion by Preganglionic Denervation. *W. B. Cannon and A. Rosenblueth* 408
The Adequacy of the Chemical Theory of Smooth Muscle Excitation. *A. Rosenblueth and W. B. Cannon with the assistance of B. Rempel* 414
Experiments on Intact and Adrenalectomized Dogs Subjected to Sodium and Chloride Depletion by Intraperitoneal Injections of Glucose. *W. W. Swingle, W. M. Parkins and A. R. Taylor* 430
Relation of Serum Sodium and Chloride Levels to Alterations of Body Water in Intact and Adrenalectomized Dog. *W. W. Swingle, W. M. Parkins, A. R. Taylor and H. W. Hays* 438
The Effect of Diets and Various Substances on the Vitamin C Content of Some Organs of the Rat. *Joseph L. Svirbely* 446
Studies on the Vitamin A Requirements of the Rat. *J. D. Greaves and C. L. A. Schmidt* 456
Studies of the Energy of Metabolism of Normal Individuals: A Standard for Basal Metabolism, with a Nomogram for Clinical Application. *Walter M. Boothby, Joseph Berkson and Halbert L. Dunn* 468
Studies of Energy of Metabolism of Normal Individuals: A Comparison of the Estimation of Basal Metabolism from (1) A Linear Formula and (2) "Surface Area." *J. Berkson and W. M. Boothby* 485

No. 3. August, 1936

The Cardiac Output in Man. Changes in Alveolar Oxygen and Carbon Dioxide Tensions During Rebreathing and the Bearing of These upon the Triple Extrapolation Method of Estimating Cardiac Output. *John S. Donal, Jr. and Clarence J. Gamble* 495
The Nerve Pathways Involved in the Palatine and Pharyngeal Respiratory Reflexes of the Cat. *Harry A. Teitelbaum, F. A. Ries and E. Lisansky* 505
Distention, A Stimulus for Uterine Growth in Untreated, Ovariectomized Rabbits. *Samuel R. M. Reynolds and Sanford Kaminester* 510

Effect of Restriction of Inorganic Salts in the Diet on Organ Growth. *Pearl P. Swanson and Arthur H. Smith* 516
The Cochlear Response as an Index to Hearing. *W. P. Covell and L. J. Black* 524
Calcium and Protein Changes in Serum During Sleep and Rest Without Sleep. *N. R. Cooperman* 531
On the Coagulation Defect in Peptone Shock. A Consideration of Antithrombins. *Armand J. Quick* 535
The Lipid Metabolism of the Hypophysectomized Dog and the Lipid and Carbohydrate Metabolism of the Hypophysectomized-Depancreatized Dog. *I. L. Chaikoff, G. E. Gibbs, G. F. Holtom and F. L. Reichert* 543
Calculation of Cardiac Output from Blood Pressure Measurements Before and After Meals. *H. C. Bazett, J. C. Scott, M. E. Maxfield and M. D. Blithe* 551
On the Adaptive Secretion of the Glands of the Jejunum. *T. L. Bourns, E. S. Nasset and R. A. Hettig* 563
The Effect of Piperidinomethylbenzodioxane (933F) and Yohimbine Upon the Action of Certain Drugs and Ions on the Nictitating Membrane. *J. F. Ross* 574
The Effects of Anesthetics on Action Potentials in the Cerebral Cortex of the Cat. *A. J. Derbyshire, B. Rempel, A. Forbes and E. F. Lambert* 577
The Passage of Visible Particles Through the Walls of Blood Capillaries and Into the Lymph Stream. *Madeleine E. Field and Cecil K. Drinker* 597
Pacemakers of Human Brain Waves in Normals and in General Paretics. *Hudson Hoagland* 604
Hypertension from Constriction of the Arteries of Denervated Kidneys. *Dean A. Collins* 616
Work Capacity of the Adrenalectomized Rat Treated with Cortin. *Dwight J. Ingle* 622
The Effect of Brewer's Yeast on Blood Production. *Ira A. Manville and Jack W. Grondahl* 626
The Effect of Prolonged Inanition on the Heart Weight/Body Weight (HW/BW) Ratio in the Mammal. *Edward J. Van Liere and Clark K. Sleeth* 635
The Influence of Copper on the Rate of Disintegration of Mammalian Erythrocytes. *G. C. Wickwire, W. E. Burge and Ruth Krouse* 638
A New Method of Partitional Calorimetry. *C.-E. A. Winslow, L. P. Herrington and A. P. Gagge* 641
The Linearity Criterion as Applied to Partitional Calorimetry. *A. P. Gagge* 656
The Determination of Radiation and Convection Exchanges by Partitional Calorimetry. *C.-E. A. Winslow, L. P. Herrington and A. P. Gagge* 669
The Influence of the Pylorus on the Secretion of Acid by the Fundus. *Charles M. Wilhelmj, F. T. O'Brien and Frederick C. Hill* 685
Index 697
